

TULI BLOCK / BASE 4/ & SAFARI CHEF.

Once you have crossed over the Botswana border whether it be Plat Jan or Kwa Nokeng intersection you travel +/- 18 to 20 KM towards Solomon's Wall till you come to Kwa Tuli Game Reserve , turn right and follow the sand road till you come to the "Lone Baobab Tree" this is the central point for the " BASE CAMP".

This is pronominally a "Bush Camp", in other words , no water, no showers and toilets!

BOTSWANA.....

THE TULI BLOCK is a vast rugged area approximately 350 km long in the extreme East of Botswana running parallel to the Limpopo River which forms the international boundary with South Africa and covers an area of 300 000 hectares.

SOLOMON'S WALL This basalt dyke once formed a natural dam wall across the Motloutse River and the two sides stand up to 30m high. A great lake lay behind this dam and evidence of its existence is to be found in the semi-precious alluvial stones in the river bed.

THE TULI BLOCK The area has numerous historical and archaeological sites, as well as rock painting. Tuli has some of the largest trees ever recorded. A Leadwood is the biggest ever and between 800 and 1000 years old. A Mashatu tree is around 800 years young and there is a Monkey thorn that is the largest to be found anywhere. An Ana tree is the largest ever measured as is a sycamore Fig.

THE TULI BLOCK Offers varied activities such as walking safaris, game viewing, birding, bicycle safaris, horse-riding safari's, off-road biking trails, and quad bike trails.
